

FREIGHTWISE Management Framework for Intelligent Intermodal Transport is an integrated project within the EU's 6th Framework Programme that aims to bring together three different sectors:

- Transport Management: shippers, forwarders, operators and agents
- Traffic and Infrastructure Management: Rail, Road, Sea, Inland waterways
- Administration: Customs, Border Crossing, Hazardous Cargo, Safety and Security

Freightwise will be at the ITS Stockholm Exhibition

See FREIGHTWISE on stand Z91. Presentations will be given at the following times showing how the FREIGHTWISE Framework has been developed and tested on actual business cases. There will be demonstrations of how harmonisation of data, architectures and messaging can promote sustainable distribution.
